

### **EMMA SHEA, October Academic Student of the Month**

Emma is a grade 12 student from North Bay, Ontario and was nominated by our teachers for a magnitude of reasons. Not only is Emma ambitious and diligent in her studies, she is also a fabulous mentor to her peers. She is dedicated to producing quality work and asking questions in order to further her own understanding. Emma is ambitious, focused and organized, and continues to portray this on a consistent basis.

Emma's favourite tennis player is Elina Svitolina, for her aggressiveness and her "never hold back" attitude, and Emma's favourite subject of the semester is Math, due to its factuality.

Emma's short-term goals are to improve her SAT score and secure a tennis scholarship at a university in the United States, where she intends to study Social Sciences or Psychology.

When asked what advice Emma would give to her peers, she responded by saying "Always listen and participate. See the big picture, rather than having a linear way of thinking. Be organized and put in the time and effort, because the material isn't going to study itself!"
